

OUR DEMANDS – THE WAY FORWARD

Nigerians, we have to use this opportunity to make changes that last. Changes that will move us to our place of destiny and prosperity as a Nation. We must make politics unattractive to thieves who get involved in politics to steal money. We must insist on the following changes.

1. House of Representative Members salaries N5,000,000.00 annually. Everything else N3,000,000.00 (housing, etc, etc)
2. Senators salaries N6,000,000.00 annually. Everything else N4,000,000.00 (housing, etc ,etc)
3. All other salaries of politically appointed government officials should be reviewed downwards accordingly. The goal is to attract only those who have a heart to serve because they have something to offer and it is their passion. They would probably be willing to do it for free. Those Nigerians exist in our society today.
4. Only the President should have a full security detail, no one else should have any police man attached to them, Governors and Ministers should have only one police man. If they are doing their jobs so well they would not need to protect themselves from the people who elected them, their people should love them.
5. The Law should be amended to allow for anyone found guilty of embezzling government money over one million naira to be jailed for 25 years.
6. No use of siren except the President, everyone should enjoy the traffic and bad roads.
7. All government officials must use public Nigerian Hospitals like the people they serve, they must not go abroad, they must not use private hospitals, if they do they must loose their jobs and go to jail, minimum 5 years.
8. All government officials must travel by road (to experience it as we do) to all official trips except for serious emergencies.
9. Children of all government officials must attend public Nigerian intuitions of education, they must not school abroad.
10. Court cases involving armed robbery, kidnapping, bombing and terrorism must be concluded within 60 days and those found guilty should be executed.
11. The details of everything above can be fine tuned further but we have to have clear demands that will have a permanent benefit for

the Nation and make our sacrifice worthwhile. Lets think strategically. ***Please broadcast this demand if you believe it will make a difference. God bless you.***

Nigerians well done!! We have finally found our voice and realized our position in the scheme of things. We are the people, the employer of the government, we elected them. Please don't topple the government, the people who will take over could be worse than the ones there now. At the moment we are reacting, which is good but we must immediately start thinking pro actively. After we Occupy Nigeria and prevail, then what? Even if the price of petrol is returned to N65 per liter. Do we go back to doing business as usual in Nigeria? Where has that led us? Is Nigeria any where close to achieving its God given potential?
